

Project Portfolio - Favaz PA

Updated on: March 5, 2025

Dear Recruiter,

Below are selected projects showcasing my skills and experience. This list is not the entire project list because some projects are confidential.

- **Karaoke App (Superstarr)** - [View Project](#)

A karaoke mobile app with real-time **lyrics synchronization**, **audio mixing**, and **live video streaming**.

My Contribution:

- Led a team of 6 people.collaborated and made the project successful.
 - Developed UI/UX using React Native with pixel-perfect design.
 - Integrated Agora SDK for real-time audio and video mixing.
 - Implemented lyrics scroll sync with audio using animation and timing logic.
 - Handled file uploads and playback with Firebase Storage.
- Tech Stack:** React Native, Agora SDK, Firebase Storage, Firebase Auth, React Navigation, Redux

- **Go Abroad App (Edumpus)** - [View Project](#)

A platform connecting students and universities globally for educational opportunities.

My Contribution:

- Built major app modules including chat, user profiles, and application tracking.
 - Integrated Firebase and Agora for real-time communication and notifications.
 - Worked closely with backend team for API integration and data modeling.
 - Optimized performance for large datasets using FlatList & lazy loading.
- Tech Stack:** React Native, Firebase, Agora, Node.js, AWS S3, React Navigation, Redux

- **E-Business Card App (ConqtLink)** - [View Project](#)

A smart digital business card solution for networking and branding.

My Contribution:

- Owned the project and collaborated with full team and led them to project success.
- Built complete feature set: profile creation, QR code generation, and real-time connections.
- Managed Firebase Dynamic Links and Firestore for seamless sharing and storage.
- Implemented clean UI with conditional rendering for user types and company branding.

Tech Stack: React Native, Firebase, Node.js, React Navigation, Redux, Dynamic Links

- **E-commerce App (Naif)** - [View Project](#)

An online selling platform tailored for the Middle East region.

My Contribution:

- Designed and implemented core e-commerce flows: product listing, cart, order management.
- Integrated Firebase and payment gateway for smooth order placement.
- Ensured RTL layout support and localization for Arabic-speaking users.

Tech Stack: React Native, Firebase, Agora, Node.js, React Navigation, Redux

- **Islamic Society App (Hayathy)** - [View Project](#)

A multi-functional app for spiritual, community, and e-commerce needs.

My Contribution:

- Developed modules like prayer timings, Zakat calculator, and in-app store.
- Implemented Firebase authentication and push notifications for updates.
- Optimized UI for user-friendly experience using reusable components.

Tech Stack: React Native, Firebase, Agora, Node.js, Razorpay, React Navigation, Redux

- **Turf Booking App (Playgenic)** - [View Project](#)

A platform for booking sports turfs and organizing games.

My Contribution:

- Created booking engine UI with filters by date, location, and skill level.
- Integrated Google Maps API for turf location and directions.
- Worked on dynamic time slot allocation and live match updates.
Tech Stack: React Native, Firebase, Agora, Node.js, Google Maps API, React Navigation, Redux

- **Management App (Process Manager)** - [View Project](#)

A task management tool for field agents and team leads.

My Contribution:

- Developed task listing and update flow with real-time sync using Firestore.
- Added push notification system for deadline reminders.
- Ensured smooth task transitions with intuitive UX.
Tech Stack: React Native, Firebase, Agora, Node.js, React Navigation, Redux

- **Food Delivery App (Foodmine)** - [View Project](#)

Multi-restaurant food delivery with live tracking and fast payments.

My Contribution:

- Built ordering flow: restaurant listing → menu selection → checkout.
- Integrated real-time delivery tracking using Maps API and Firebase.
- Set up payment options including Razorpay and COD.
Tech Stack: React Native, Firebase, Agora, Node.js, Google Maps API, Razorpay, React Navigation, Redux

- **Car Booking App (Cabture)** - [View Project](#)

A ride-hailing app supporting worldwide ride booking and airport transfers.

My Contribution:

- Created booking screens, ride tracking UI, and fare estimation logic.
- Integrated location services and driver tracking with Maps API.

- Built user-friendly navigation and responsive UI across devices.
Tech Stack: React Native, Firebase, Agora, Node.js, Google Maps API, React Navigation, Redux

- **Virtual Golf Arrangement App (Golf) - This project is a clover based project**

Manages virtual golf bays in malls or gaming zones with smart layout and booking.

My Contribution:

- Designed bay layout system based on venue area using dynamic UI rendering.
- Integrated Clover API for real-time POS payment handling.
- Handled player management, scoring system, and slot bookings.
Tech Stack: React Native, Firebase, Agora, Node.js, Clover POS, React Navigation, Redux

- **Video Calling App - [View Project](#)**

A personal one-on-one video calling app with high-quality streaming.

My Contribution:

- Designed and built end-to-end UI for video call flow.
- Integrated ZegoCloud for low-latency, real-time video calls.
- Tested across devices for consistency and responsiveness.
Tech Stack: React Native, ZegoCloud, Firebase Auth, React Navigation, Redux

Regards,
Favaz
